

EDUCATION

Syracuse University
Bachelor of Science in Computer Science
Activities: SU Research Opportunities, Cuse Hacks, Information Technology Services
Relevant Coursework: Data Structures, Discrete Mathematics, Systems and Network Programming, Analysis of Algorithms, Software Specification and Design

Syracuse, NY
Exp. May 2026

PROJECTS

FactSet API
• Build and maintain a C# integration with the FactSet API using .NET Aspire, enabling cloud-native access to real-time and historical financial data.
• Develop modules for Entra-authenticated API access, data retrieval, and parsing on the Azure Platform, streamlining workflows for financial analysis and reporting.
• Leverage SQL to query large datasets and experiment with Agentic AI approaches to enhance equity research and custom data visualizations.

May 2025 – Present

Swapify - Student Marketplace App
• Developing a secure student marketplace with profile management, listings, and in-app payments.
• Implementing a monitored in-app chat system and safety measures for secure transactions.
• Adding key features like a rating/review system, real-time notifications, and multiple payment options (Credit Card, PayPal, Apple Pay, Google Pay).

September 2024 - May 2025

Cuse Hacks - Gym Tracker
• Developed a real-time gym entry and exit tracking system for the university gym using Python and JavaScript.
• Implemented secure user authentication and database logging to maintain accurate visit records for gym members.
• Utilized Git for version control and Agile methodologies to streamline development and deployment processes.

December 2023

WORK EXPERIENCE

First Year Seminar
Teaching Assistant
• Facilitate discussions on university resources, academic programs, and student success strategies for first-year students.
• Lead workshops on diversity, equity, and inclusion to promote intercultural awareness and a welcoming campus culture.
• Assist faculty in delivering interactive, student-centered learning experiences that support the college transition.

Syracuse, NY
August 2025 – Present

Nim-os (Subsidiary of Loomis Sayles)
Software Engineering Intern
• Work directly under the CTO to build a scalable C# API for delivering structured financial company data.
• Write and optimize SQL queries for efficient data extraction and aggregation from large datasets.
• Use Swagger UI and GitLab for API documentation, version control, and CI/CD in an Agile environment.

Boston, MA
May 2025 – Present

Syracuse University Information Technology Services
Technology Consultant
• Troubleshoot hardware/software issues and configure systems to support student and faculty users.
• Deliver timely tech support via in-person consultations and ticketing, ensuring fast, clear resolutions.
• Enhance user experience by resolving technical problems efficiently and professionally.

Syracuse, NY
November 2023 – Present

SKILLS & INTERESTS

Programming Languages	Java, Python, C, C#, JavaScript, HTML, CSS
Frameworks & Tools	Git, Bash, SQL, Swagger UI, GitLab, .NET
Achievements	Dean's List (Syracuse University), High School Honor Roll, CPR Certified
Spoken Languages	English (fluent), Armenian (fluent)
Interests	Software Development, Web Design, Rowing, Basketball, Music, Traveling

COMMUNITY ENGAGEMENT & LEADERSHIP

Riverside Boat Club – Team Captain
Riverside Boat Club
• Led a competitive rowing team, organizing training schedules, race strategies, and team meetings to optimize performance and cohesion.
• Coordinated with coaches and club leadership to plan regattas, logistics, and athlete development programs.
• Mentored junior rowers, fostering technical skill growth, teamwork, and a strong sense of sportsmanship.

Cambridge, MA
September 2020 – May 2022
