

EDUCATION

Syracuse University
Bachelor of Science in Computer Science
Recognition Dean's List, Cum Laude (3.4 GPA or Higher)
Activities: SU Research Opportunities, Cuse Hacks, Information Technology Services
Relevant Coursework: Data Structures, Discrete Mathematics, Systems and Network Programming, Analysis of Algorithms, Software Specification and Design

Syracuse, NY
August 2022 - May 2026

WORK EXPERIENCE

Dexian (Contracted to Loomis Sayles)
Junior Software Engineer

- Developed a C#/.NET workflow platform for client meeting scheduling, calendar management, and investment workflows.
- Built SQL-backed workflow automation to streamline scheduling, task management, and business processes.
- Implemented scalable application features that improved usability, performance, and operational efficiency.
- Collaborated in an Agile environment to design, test, and deliver production-ready software.

Boston, MA
July 2026 – Present

Dexian (Contracted to Loomis Sayles)
Software Engineering Intern

- Developed a cloud-native C#/.NET Aspire API delivering secure access to real-time and historical FactSet financial data.
- Built Entra-authenticated REST endpoints and optimized SQL queries on Azure for secure, high-performance data retrieval.
- Collaborated with the CTO using Swagger UI, GitLab, and CI/CD pipelines within an Agile development environment.
- Prototyped Agentic AI features for automated equity comparisons and custom research insights for investment teams.

Boston, MA
May 2025 – July 2026

Syracuse University Information Technology Services
Technology Consultant

- Troubleshoot hardware, software, and network issues for students, faculty, and staff across the university campus.
- Configured and maintained university devices, user accounts, and systems to ensure reliable day-to-day operation.
- Delivered timely technical support through in-person consultations and a centralized ticketing system.
- Documented technical solutions and collaborated with team members to improve support efficiency and service quality.

Syracuse, NY
November 2023 – May 2026

PROJECTS

Terminal-GPT – Local AI Terminal Chat

- Developed a lightweight terminal chat application powered by locally hosted Ollama models, eliminating cloud costs and API key requirements while supporting fully offline conversations.
- Implemented guided CLI onboarding, automated environment configuration, and performance optimizations to improve model responsiveness and multi-session usability.

December 2025 – Present

Mini Unix Shell in C

- Developed a custom Unix shell in C supporting command execution, parsing, input/output redirection, and pipelines using `fork()`, `execvp()`, `waitpid()`, and `pipe()`.
- Applied operating systems concepts including process management, file descriptors, memory management, and interprocess communication to build a functional command-line environment.

January 2025 – February 2025

SKILLS & INTERESTS

Programming Languages	C#, C, Python, Java, JavaScript, SQL, HTML, CSS
Frameworks & Tools	.NET Aspire, Azure, Git, Bash, Swagger UI, Docker, React, Node.js
Spoken Languages	English (Fluent), Armenian (Fluent)
Interests	Full-Stack Development, AI Agents, Distributed Systems, DevOps Automation, API Design

COMMUNITY ENGAGEMENT & LEADERSHIP

Syracuse University – First Year Seminar Program
Teaching Assistant

- Facilitated discussions on university resources, academic programs, and student success strategies for first-year students.
- Led workshops on diversity, equity, and inclusion to promote intercultural awareness and a welcoming campus culture.
- Supported faculty in delivering interactive, student-centered learning experiences to assist students in their transition to college.
